TRIED: TESTED: TRUSTED

The Distinction Collection of GRP (fibreglass) faced composite door blanks, is sourced from Distinction Door Solutions, the country's leading supplier of this type of door. Distinction Door Solutions is the UK partner of Nan Ya Plastics who developed the process of making doors in thermoset fibreglass.

The door's surface is made from impact-resistant fibreglass and is compression moulded to offer detailed panel definition and lifelike wood grain effect. Its CFC-free polyurethane foam core provides very high sound and heat insulation, and the finished product will not expand, contract, bow, warp or twist.

The Distinction Collection's unique screw-less glazing system is designed to match the panelling on the door, both in style and colour, and offers security without unsightly screws and plugs. The glazing cassettes are available in a wide range of styles and colours with glass ranges to suit all tastes and locations.

These door blanks and glazing system have been used to upgrade the entrances of hundreds of thousands of homes in the UK over the last 10 years. The product is tried, tested and trusted.

Give your home the entrance you've been looking for...give it a door of Distinction!

About our Glass

To enhance the appearance of your Nan Ya GRP Composite Door, we are offering three ranges of high quality glass that conforms to the stringent UK and European regulations for glass supply to domestic housing. This standard is BS EN 12150 and specifies the tolerances, flatness, edgework, fragmentation, and physical and mechanical characteristics of monolithic flat thermally toughened soda lime silicate safety glass for use in buildings. In short, this standard ensures that the glass used in our units conforms to the tolerances specified for safety, acoustic and thermal properties.

ANDAMAN

Andaman

The Andaman range is a family of elegant designs matching our 12 glazing cassettes constructed in triple glazed units for high performance sound and heat insulation. These units are offered in both Zinc and Brass coming to blend with a wide range of door furniture. With both the coming and light enhancing glass bevels encapsulated within the triple glazed unit, this range is both beautiful and easy to clean as both sides provide a flat surface and the bevels cannot attract dirt and dust.

BARENT

Barent

The Barent range of resin bevelled glass, in double glazed units, is both elegant and eye catching. With privacy afforded by the stippled background and the light enhancing design encapsulated within the insulated glass unit, the design is striking while easy to clean. This is modern glass technology at its best.

MEDITERRANEAN

Mediterranean

The Mediterranean suite combines beautiful traditional backing design with elegant oval cut glass bevels that provide the benefits of light refraction. This range is made with the finest materials and most up to date techniques to offer a panel that is not only beautiful but also practical and easy to maintain.

First Impressions Last ...

... this has never been truer than in the case of a front door, and this is why the GRP faced composite door has become the door of choice.

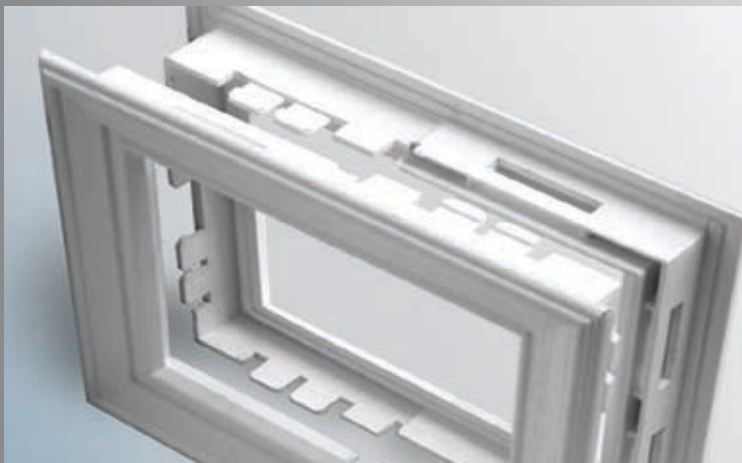

Manufactured from thermoset GRP (Glass Reinforced Polyester), the doors are compression moulded to give a high definition panel design with an authentic timber appearance which is unaffected by variations in temperature.

The stiles and rails are composed of water resistant polymer which are bonded to the skin and filled with an insulating core of 100% CFC-free polyurethane. This provides a thermal efficiency nine times that of a timber door. This is a door that is strong, stable, durable and secure...and looks very good indeed!

- Woodgraining is indistinguishable from timber
- Manufactured by a technically advanced and proven Sheet Mould Compound, Thermoset, process for the Glass Reinforced Polyester skins. This provides impact resistance, thermal and UV stability, durability and easy maintenance
- Pre-pigmented solid colours and three process painted finish woodstains
- Choice of 14 glazed door styles and 3 solid door options

The advanced glazing system, comprising a through coloured, snap together ABS cassette, matches both the skin and depression mouldings of the door. It is secure and attractive, with no unsightly plugs or screws.
